

IN THE ABSTRACT:

Please replace the Abstract with the following amended Abstract. A clean version of the amended Abstract is presented on a separate page as an Attachment to this Preliminary Amendment:

Optimized digital operational encoding and input method of world character information and information processing system thereof are directed to digital encoding technology of world character information. It thoroughly solves the conflict between the simplicity and high efficiency for encoding the world character information, and ~~characterized by:-~~ according to the pronunciation and the glyph information of world characters, ~~perform~~ performs the digital operational encoding ~~[[on]] to~~ the world character information with ten numerals 0-9 unifiedly by means of the encoding method operated with addition and subtraction by areas and positions. The method and device ~~of the present invention~~ takes these number codes as the index codes of retrieving the literatures of world characters and the computer input codes of world characters, so as to build up a complete set of method and systems capable of using world character to design the operating system, computer language, chip instruction, wireless interface protocol, and wireless internet protocol, used widely for computer, communications, network system, and the sorting and retrieving system of world character codes.
